1. User's Manual

- This document provides the operation instructions for the "OneLink" and it explains how it function and what is required to run this web server. It also provides installation instructions with step-by-step guide to install the software and launch it successfully.

Before running the software, make sure to download the required software and install the dependencies.

- Node.js
- Clone the GitHub repository.

2. Installation Instructions

▪ System Requirements

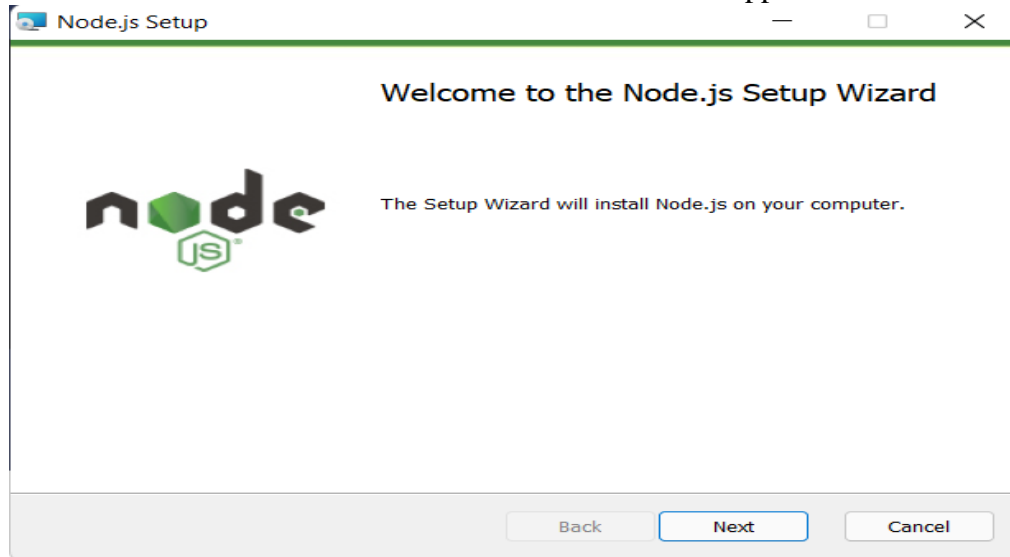

The software has been tested on Windows 10 and Windows 11.
It should run on any operating system and support any modern browser.
Example: Google, Mozilla Firefox, Microsoft Edge

▪ Software Setup

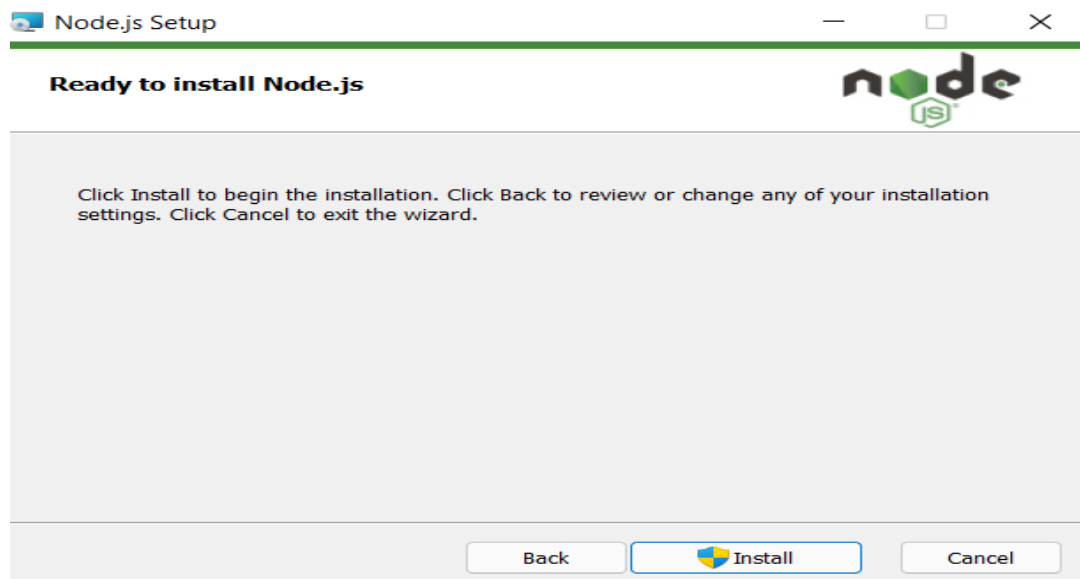

- Navigate to <https://nodejs.org/en/> and download either the LTS or the current version.

- Launch the installation file and a screen like this should appear.

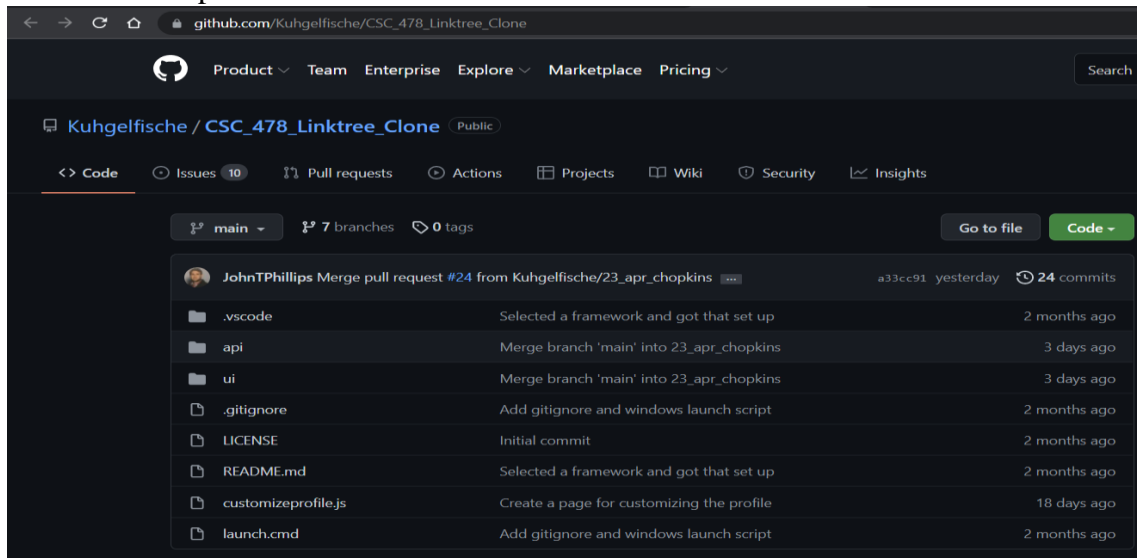

Click on the Next button to proceed with installation. To proceed with the installation, click on the check box to accept the terms and conditions. After that if you want to change the directory, select a different directory, or select next to continue installing the software. Click next to continue and select the features to install. Finally, click the next button to proceed with the installation and select to install the Node.js.

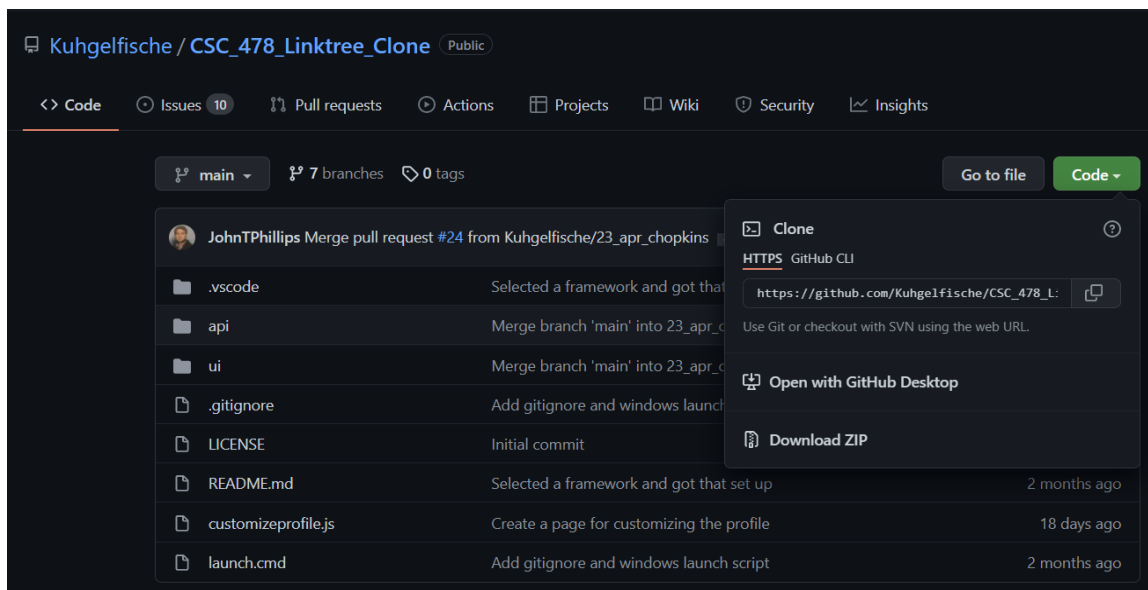

▪ Setting up Working Directory

- Open your browser and navigate to https://github.com/Kuhgelfische/CSC_478_Linktree_Clone and select the Code button.

You will be presented with a screen that looks like this

Next, select the code button and choose the download zip file option.

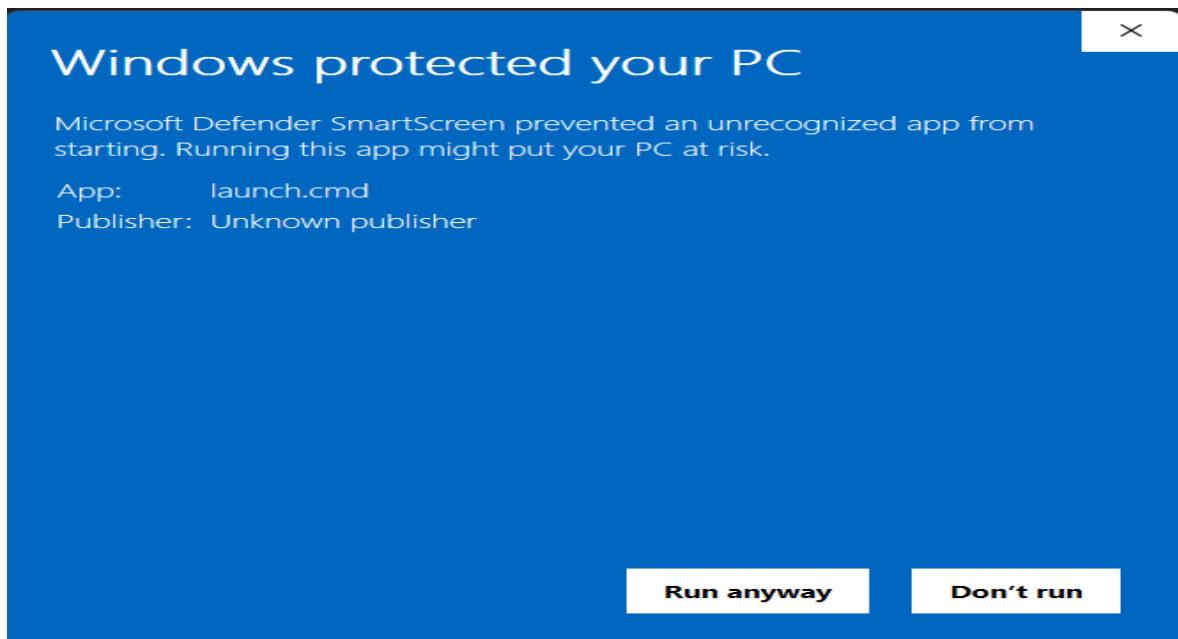

After saving the zip file, save it to the desired working directory.

Extract the zip file to the desired working directory.

You should have a directory that looks like this

Name	Date modified	Type	Size
.vscode	4/25/2022 1:24 PM	File folder	
api	4/25/2022 1:25 PM	File folder	
ui	4/25/2022 1:25 PM	File folder	
.gitignore	4/25/2022 1:24 PM	Git Ignore Source ...	1 KB
customizeprofile	4/25/2022 1:24 PM	JavaScript File	3 KB
launch	4/25/2022 1:24 PM	Windows Comma...	1 KB
LICENSE	4/25/2022 1:24 PM	File	2 KB
README	4/25/2022 1:24 PM	Markdown Source ...	1 KB

- To launch the server, click on the launch batch file. If you receive a SmartScreen warning, then click on more info and choose Run anyway.

- After clicking on the batch file, you should see two command prompt windows appear.

```

> api@1.0.0 dev
> nodemon .

[nodemon] 2.0.15
[nodemon] to restart at any time, enter `rs`
[nodemon] watching path(s): *.*
[nodemon] watching extensions: js,mjs,json
[nodemon] starting `node .`
API listening on port 8080
```

Now that the server is launched, navigate to your browser and type <http://localhost:3000>.

- This will navigate you to the home page of **OneLink**.

▪ Account Creation

- Click on the Sign-up link to start creating your account.

The image shows the sign-up form on the OneLink website. The navigation bar at the top has 'Link Tree Clone' and 'Home' on the left, and 'Sign up' and 'Log in' on the right. The form contains four input fields: 'Username' with the value 'patrick500', 'Email address' with the value 'hpotter@hogwarts.com', 'Password' with the value 'MischiefManaged!', and 'Confirm Password' with the value 'MischiefManaged!'. Below the fields is a blue 'Sign Up' button.

Once the sign-up page open, enter the desired email, username, and password to create an account. To create a password, make sure it is 6 to 8 characters and contains uppercase letters, lowercase letters, numbers, and symbols. Once you enter the information then click the Sign-up button. Next, you will be redirected to login page.

▪ Account Login

The screenshot shows the login interface of 'Link Tree Clone'. At the top, there is a navigation bar with 'Link Tree Clone' and 'Home' on the left, and 'Sign up' and 'Log in' on the right. Below the navigation bar, there are two input fields: 'Username' with the value 'superman5' and 'Password' with the value 'MischiefManaged!'. A blue 'Login' button is positioned below the password field.

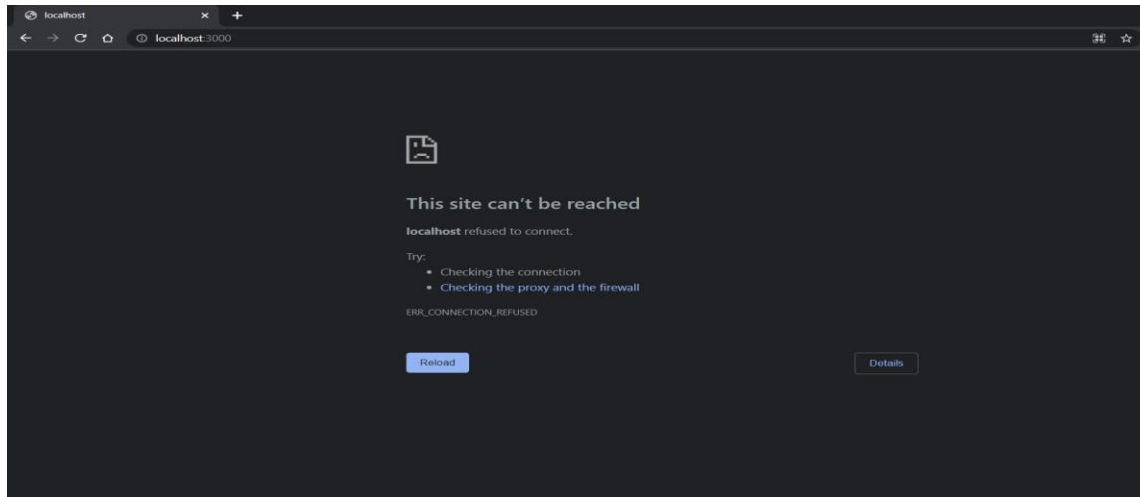

To access your account, enter your username and password to login to your account. After you login, there should be an option for Profile and Manage on the home screen. On the Manage Account, the user has options to edit links and add bio information.

The screenshot shows the 'Manage Account' page of 'Link Tree Clone'. The navigation bar at the top includes 'Link Tree Clone', 'Home', 'Hi, user1', 'Profile', 'Manage', and 'Log Out'. The main heading is 'Manage Account'. Below it, there is a blue 'Edit Links' button. Underneath, there is a 'Bio' section with a text area containing the placeholder text 'Here's a little something about myself...'. A green 'Save' button is located at the bottom of the bio section.

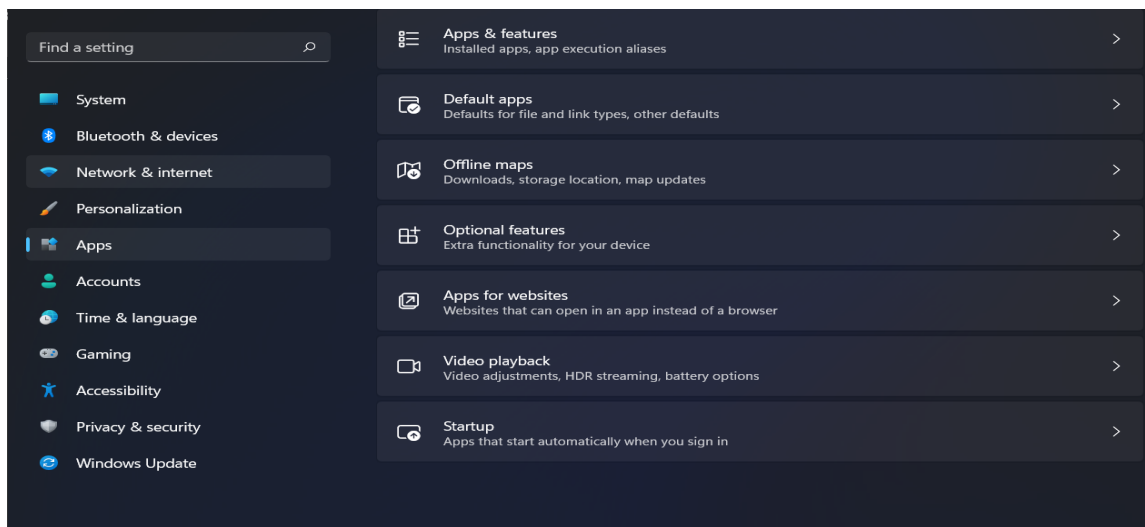

▪ Troubleshooting

- Error Message: Cannot connect to localhost

When accessing the server, if you receive an error such as localhost refused to connect, then try the steps below to troubleshoot the problem.

Check whether Node.js is properly installed by opening the settings panel and select apps.

After select apps and features, click on the Node.js installation file and reinstall the program. Now try to relaunch the server.

If you continue to receive errors, then check if the batch file is launched.
